- Total System

The world's only total pool cleaner.

Introducing the Hayward® Phantom™, designed to totally clean the pool bottom, walls and stairs and systematically rise to skim debris from the top of the water.

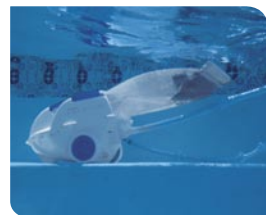

Skims the Surface

Cleans the Bottom

Cleans the Sides

Cleans the Stairs

Not only does the Phantom clean the bottom and sides of your pool, it automatically rises to the top and skims the surface. In auto mode, Phantom cleans the bottom and sides for approximately 13 minutes, then surfaces for seven minutes – repeating the cycle until your pool is totally clean. The average pool can be completely cleaned in under three hours. You can also set Phantom to clean bottom only or top only. It's a custom-made clean only Phantom can deliver.
